[PSX] Twisted Metal 2 [SCUS-94306] Bin/4/5 \*\*\*\* ★VIEW GAME There are two components for playing a ds Pokemon Black rom on your PC. The first component is the emulation program which can imitate the ds OS and software. The second component is the Pokemon Black rom itself to play on the emulator. Step 1: you can start by downloading a reliable and bug free emulator. We'd suggest NO\$GBA - it's open source, fast and one of the most frequently updated. Once you have finished downloading NO\$GBA , extract the downloaded .zip file to a location, for example your Desktop. After, double click the no\$gba.exe file in order to start the emulator. Your emulator will now be ready to play Pokemon Black rom. But now you'll need to find the correct ROMs online. A ROM is essentially a virtual version of the game that needs to be loaded into the emulator. Step 2: return to NO\$GBA and hit File > Open. Navigate to the downloaded .exe file and double click it to open it. The game will now run on the emulator and you can play the game freely. Tip: Saving games on an emulator functions a little differently. The integrated save system will not save your progress. Instead, you'll need to click File > Save State and then choose an empty slot. You can save your progress in whatever point you like within the game, not only on the official checkpoints offered by the game. When playing in the future and you want to continue from your saved state, you can use File > Load State to load up the game from exactly where you last saved it. Pokemon White 2 is the other game released alongside Black 2. These games are direct sequels to Black and White and they still rely on Generation V Pokemon but with a new story and characters. Anyway, this means that the game still has some function AR codes or cheats that you can use. The codes that are listed below are for the NA version only so just keep that in mind. We'll also add a lot of instructions needed to activate the codes when you need to. If you want to encounter a level 10 Bulbasaur, then just discard 648 Master Balls which will leave you with 1 and that's Bulbasaur's National Pokedex number.
